NEW SERIAL NUMBERING PROCEDURE TO COMPLY
WITH THE GUN CONTROL ACT OF 1968

Ilion has completed the changeover to new serial numbering procedures for each model in order to establish a unique number for each firearm produced. I have attached a list by model giving the last serial number used under the old system, and the date and number used for the first firearm under the new system. We plan to review serial numbers annually to assure adequate lead time to change before depletion of allotted numbers within a model.
