

PRODUCT RELIABILITY

R & D displayed a summary listing of all of the various gun models and comprehensive tests as used in the development and audits. It was proposed that the records be brought up to date and properly catalogued for safety, endurance and function. Some tests may have to be repeated if the early data are not available.

In the discussion, suggestions were made for changes to the Model 870 Slide Action Shotgun and Model 760 Slide Action Center Fire rifle. R & D is to review the proposed revisions with Marketing.

R & D also described how the new equipment is being used in calculating the design requirements for future models.

The meeting adjourned at 1:30 p.m. The next meeting is scheduled at Ilion on Thursday, February 20, 1969 at 11:00 a.m.
