

BENCH REST BULLETS

R & D reported that the tooling of existing presses is being completed. Some bullet jackets have been drawn experimentally. The project to provide funds for the blanking and cupping press has been circulated for approval.

When R & D is in production, Ilion produced bullets should be used in the testing of Model 40XB rifles.

SEMI-ANNUAL ARMS DEVELOPMENT SCHEDULE

The draft of the Semi-Annual Arms Development Schedule was reviewed. The recommended changes will be made and then submitted to General Management for approval. It was decided not to schedule several items which had been proposed by Marketing pending results of Design and Process investigations. These included 34" 12 gauge ventilated rib trap Barrels and rifled Barrels for shotgun slugs.

The meeting adjourned at 2:30 p.m. The next meeting is scheduled at Ilion on Wednesday, March 19, 1969 at 11:00 a.m. Economics for several of the proposed new guns will be reviewed. Also R & D will present the long range development program.
