

Adjustable to a locked position at "zero angle" (straight away target flight).

Adaptable to an additional auxillary elevating unit to meet requirements for International target shooting.

Functions

- A. Angles - non readable*
- B. Functions in all weather conditions.
- C. Complete cycling from release to release within two seconds for both singles and doubles.
- D. Adaptable for use with all standard brand targets.
- E. All working parts completely enclosed in a protective case.
- F. Quiet running (not noticable by shooters).
- G. Instantaneous electric release.
- H. Adaptable to autoloading features.
- I. Easy target loading for manual and autoloading use.
- J. 60,000 cycle life before major overhaul

Maintenance

- A. Minimum preventative maintenance.
- B. Simple replacement of vulnerable parts.
- C. Standardized parts which are readily available from local sources.
- D. Parts and assemblies should be easily accessible for maintenance.
- E. Complete interchangeability of parts.

*Shooters can not guess the projected target flight they are about to call for.
