## MODEL 870, 28-410 GAUGE MODEL 1100, 28-410 GAUGE SHOTGUNS

R & D contacted Federal regarding the testing of Model 1100, 410 gauge guns. In addition to the results reported in the September Minutes, two guns from customer purchased Matched September Minutes, two guns from customer perfectly. Pairs had been tested by Federal. One functioned perfectly. checks to be made for piston alignment and position of the gas seal. Since no further report has been received, it is assumed the gun functioned satisfactorily after re-assembly.

In the contact with Federal, there was no further mention of the shell swell at the Extractor position. It is believed that the function failures that occurred in the initial testing as reported at the September meeting were due to low impulse shells 👌 1. 19 

The Plant reported the following production to warehouse figures: 35.

	Möđel	870	410 gauge field grade 28 gauge field grade Matched Pairs	3103 1215 1049
	Model	1100	410 gauge field grade 28 gauge field grade Matched Pairs	1903 791 903

Total small gauge guns produced to warehouse to date 10,916
