

RIM FIRE RIFLES - contd.MODEL 591-592, 5mm RIM FIRE RIFLES
(Introduction 1970)

Production reported that as of December 17, 1969, the following rifles had been produced to warehouse:

Model 591 Clip Magazine	478
Model 592 Tubular Magazine	<u>180</u>
Total	658

The schedule is to produce seven hundred and thirty-nine (739) rifles to the warehouse by the end of December.

Approval to release drawings to SAAMI was discussed. Some manufacturers are reported to be considering producing 5mm caliber handguns. Before release, the drawings should be reviewed and the headspace and other requirements to satisfactorily handle this cartridge in a rifle or handgun should be included.

Committee Action:

R & D was authorized to release the 5mm caliber drawings to SAAMI after the drawing changes have been made. Reporting on rifle production will be dropped by the Committee.

NYLON 77 RIM FIRE CLIP MAGAZINE RIFLE
(Introduction 1970)

The Nylon 77 Stock molds were received, tried out November 24 and returned to the vendor for rework. There were appearance and dimensional changes required. The vendor expects to return the molds to Ilion by the end of December.

All other components to assemble pilot rifles have been completed. Production to warehouse is scheduled in February 1970.
