

RIM FIRE RIFLES - contd.NYLON 77 RIM FIRE CLIP MAGAZINE RIFLE - contd.

The 10-shot Magazine molds are promised the week of December 22. Magazine Boxes should be ready to confirm function in the Model 581 Clip Magazine and pilot Nylon 77 rifles in January 1970.

MODEL 541S RIM FIRE CLIP MAGAZINE SPORTER RIFLE  
(Introduction 1971)

The prototype Sporter Rifle reviewed at the November meeting has been modified to provide the proposed changes to the Grip Cap and a new Safety. The rifle was shown at the December meeting.

Economics are being developed and should be reviewed at the January meeting.

Committee Action:

The revisions to the Grip Cap and the Safety were approved.

FIREARMS TESTING

The changes required to comply with the proofing and function testing which the SAAMI Director of Safety will probably recommend for the firearms industry were discussed.

A report will be written and reviewed with the Legal Department. When approved, a copy will be issued to include as Exhibit 1 of the December Minutes.

TARGET TELESCOPES

R & D reported that with the manufacture of Mounts at Ilion and receipt of additional Mounts from the vendor, forty (40) Target Telescopes should be shipped in December.
