

TRAPSTOURNAMENT TRAPS

R & D reported that the angling cams on the prototype Tournament Traps were not considered satisfactory in the first tests. Cams are being revised and other deficiencies corrected. A second test is scheduled the week of May 25.

To date, work has been confined to development. No endurance tests have been made. It will probably be July or August before a prototype Tournament Trap will be available for testing at Lordship.

The meeting closed at 1:30 p.m. The next meeting is scheduled to be at Ilion Thursday, June 25, 1970 at 11:00 a.m.
