

LIMITED DISTRIBUTION
Semi-Annual
Arms Development Schedule

The following changes and additions have been made:

Center Fire Rifles

Model 700 - Improvements	This has been added and consists of non-ventilated recoil pad, solid magazine follower, rear sight, firing pin for faster lock time, shrouded bolt plug, and bolt guide. Appearance changes include engraved floor plate, revised fore-end tip, improved metal finish and improved checkering on BDL.
Model 742X	The caliber sequence has been changed and the interchangeable calibers added. Date for phasing out old model will be established by Marketing.
Model 760X	The caliber sequence has been changed and the interchangeable calibers added.

Rim Fire Rifles

Models 552X and 572X The first concepts were not economically feasible. A second approach has been rescheduled.

Shotguns

Model 1100X	12 Ga. - Autoloading Trap and Skeet guns have been added for introduction in 1976 having interchangeable gauges for Skeet gun in 20, 28 and 410.
Model 1100X	Autoloader. The small gauges have been added and date for discontinuing old model excluded.
Model 870X	Pump - Trap and Skeet guns in 12 Ga. have been added for introduction in 1978 having interchangeable gauges for the Skeet gun in 20, 28 and 410.
Model 870X	Pump Guns. The small gauges have been added and date for discontinuing old model to be determined.

Attached is a summary schedule of significant events; i.e. announcement dates and the schedule for release of the designs to the Production Department for tooling and facilities. The specific months for design releases on some items are not yet firm, and are identified by asterisks.
