

DESIGN REQUIREMENTS (Continued):

12 Gauge Light Weight (Field)  
(Jan., 1976)

1. Standard field gun with lightening cuts in the main assemblies and stock to reduce the weight of the gun from 1/2 to 3/4 of a pound.

20 Gauge Program  
(Jan., 1977 or 1978)

1. Develop a 20 Gauge O/U using all the fire control and related parts from the 12 Gauge. This would be a brand new gun which would also be used to make the 28 and 410 Gauge guns. Both Skeet and Field guns would be developed in the 20, 28 and 410 Gauges. All Field guns would have a 3" chamber.
