RIM FIRE RIFLES

MODEL 541-S SPORTER BOLT ACTION CLIP MAGAZINE RIM FIRE RIFLE (Introduction 1972)

Production reported that Model 541-S actions have been assembled to meet the August schedule. Eight hundred assembled actions have been completed.

R & D reported that N/C checkering of Stocks will start Nov. 1. A sample Stock with the new fore-arm pattern was shown.

MODEL 540X AND MODEL 540X-JR POSITION RIFLES
MODEL 40XB STANDARD POSITION RIFLE - RIM FIRE
MODEL 40XB ARMY NATIONAL MATCH COURSE RIFLE

Marketing reported that competition is hurting Reminston target rifle business primarily because of Stock design. New design target Stocks were made and shown at Camp Perry this year. The rifles were well received and this appears to be the way to regain some of this business. It was requested that economics be developed for these rifles.

R & D reported that the present work program will not allow completing the design work required for 1973 introduction of these rifles.

Marketing taken that at least one of these rifles be available for introduction at Comp Perry in August, 1973.

The three models are to be added to the Development Schedule.

GENERAL

R & D reported that development work on the polyurethane foam Stock is being delayed because of higher priority work. It was suggested that this item be deleted from the Agenda until January, 1973.
