to the records of Southwest which may establish a reduction to practice as early as 1954 or which may establish only an abandoned experiment at that time. In the latter event the September 1971 contact with Remington may still antedate Paulson.

Until the probable interference is decided or settled, it is difficult to predict whether a patent will issue or who will be found to be the first inventor.

JHL'DH

40.5 Supp.

83
JOHN H. LEWIS, Jr.,
Patent Attorney.
