

CENTER FIRE RIFLES - contd.MODEL 700 BOLT ACTION CENTER FIRE RIFLE - IMPROVEMENTS - contd.  
(Introduction 1974)

Du Pont development of the high speed multi-head N/C checkering machine is on schedule. Equipment is being ordered as required to meet schedule. Two 3-head machines will be built within project authorization.

Training in use of powered hand checkering tools is progressing with an output of up to three Model 541X Stocks per day per person. A powered hand checkering tool was shown at the meeting.

NEW REAR SIGHT - MODEL 700, 742, 760.  
1100 DEER GUN AND 870 DEER GUN BRUSHMASTER

Production reported that the new Rear Sight is being used on Model 700 rifles. It is planned to begin using this Sight on Models 742 - 760 in May.

MODEL 788 BOLT ACTION CENTER FIRE RIFLE - INTERNATIONAL

Marketing proposed making 500 Model 788 rifles chambered and marked for the 7.62 mm NATO ammunition for International Sales - Exhibit 3. The quantity could increase to 1500 rifles over the next year.

Production would like to use the 7.62 mm chamber for this and the 308 Winchester caliber. R & D is to determine whether or not this is acceptable.

Committee Action:

The Operations Committee approved Marketing's proposal to produce Model 788 rifles chambered and marked for the 7.62 NATO ammunition for International Sales.
