

SHOTGUNS - contd.MODEL 3200 SHOTGUN - contd.

Although a definitive improvement in black oxide color durability has not been established, constructive work is in progress:

- . Corrosion and wear tests are being made.
- . Trigger Guards and Top Lock Levers are being cycled through coloring unit two times.
- . Production tests have started on cycling all components through coloring unit two times.
- . Du Pont EML consultant was at Ilion November 12 and is to propose a program for assistance.

MODEL 3200 ONE OF 1000 AND PREMIER SKEET SHOTGUNS
(Introduction 1974)

R & D reported that programming for N/C engraving and checkering of Model 3200 One of 1000 and Premier skeet shotguns is on schedule. Tapes for production use will be ready in December.

Production reported status of wood for these guns under Model 3200 shotgun. The limited quantity of fancy European grown walnut that has been located sells for \$150 to \$185 per Stock blank.

Marketing is to review all Premier and One of 1000 schedules in light of the wood supply.

Production is to look again at other available fancy woods. What has been too expensive may not be now. Consultant help should be used.

MODEL 3200 FIELD MAGNUM SHOTGUN
(Introduction 1975)

Economics for the Model 3200 Field Magnum Shotgun were reviewed, Exhibit 1. It was recommended the gun be released to production.
