

SHOTGUNS - contd.MODEL 3200 ONE OF 1000 AND PREMIER SKEET SHOTGUNS - contd.

Because of wood supply, Production expects to make about 80 of these guns in March and 50 in April. The percentage of fancy wood blanks has been very low; however, this may improve. 300-400 fancy blanks from another source have been ordered for September delivery. About 100 of these One of 1000 skeet shotguns are waiting for stocks. A total of 400 frames have been roll marked and are being completed. Approximately 200 guns are in the warehouse of which about half do not have the standard Recoil Pad.

It was concluded that:

- . All One of 1000 skeet shotguns in the warehouse are for the domestic market.
- . The next wood available will be used for Premier trap shotguns.
- . Assembled actions of One of 1000 skeet shotguns will be held.
- . The Operations Committee will review detail status monthly.

Committee Action:

The Operations Committee approved the production sample Model 3200 One of 1000 skeet shotgun and recommended General Management release for invoice shipment.

MODEL 3200 FIELD MAGNUM SHOTGUN
(Introduction 1975)

Production reported that trial and pilot of the Model 3200 field magnum shotgun will start in April. Changes in product design will delay tooling on the Vent Rib but not introduction date.
