

BENCH REST BULLETS

R & D reported that breakeven on factory cost was achieved in April. With the price increase, a breakeven on full cost should be achieved.

TRAPSELECTRIC TOURNAMENT TRAP
(Introduction 1973)

Over 70 M4100 traps are now in service at gun clubs throughout the country. Acceptance of this product by club managements and trap shooters is indicated by numerous reports of satisfactory performance and the increased rate of sales.

Overall, reports to date show that M4100 traps are well received by the gun club trade, performance and reliability are satisfactory and the product will contribute to our program for the promotion of clay target shooting. The #1-1974 Forecast for 96 units should be met.

REMINGTON SKEET TRAP
(Introduction 1975)

R & D reported that major parts are on order for a new prototype trap. Delivery is expected in December and reporting will be dropped until then.

NEW MECHANICAL TRAP

R & D reported major parts are on order for the prototype trap with delivery expected in September. Some difficulty is being experienced in getting a long life spring adequate for regulation doubles.

Marketing reported that the projected \$125 cost is not prohibitive.
