

April 26, 1994

Remington Arms Company  
14 Hoefler Avenue  
Ilion, New York 13357

Attention: Dennis Sanita

Dear Mr. Sanita:

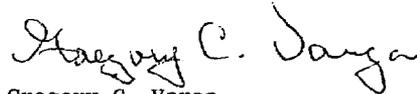

On April 18, 1994, while participating in our monthly qualification program, my rifle experienced an abnormality that I had not incurred previously. While chambering a Federal 308 Winchester Match 168 grain Boat-tail hollow point, the bolt was placed in a closed position when the rifle discharged accidentally. My shooting finger was not in the trigger guard when this occurred.

This weapon was purchased in 1990 and approximately 550 to 600 rounds have been fired through it.

In the early stages, this weapon was experiencing a functioning problem with the bolt extracting empty brass casings. This was corrected by a new insertion of a retaining clip to the front bolt. This work was performed by Cherry Corners, 11136 Congress Road, Medina, Ohio, phone: 216-948-1238.

Your cooperation in this is greatly appreciated and time is of the essence in repair and return of this weapon as it is used by our Tactical Team.

Sincerely,

Gregory C. Varga  
Range Officer  
Brecksville Police  
Department

(Phone: 216-526-8900)

*\* Was offered to having him to use used for Off-Duty during this time. 4/26/94*
