It is expected that these guns will be completed by September 1.

MODEL 3200 FIELD MAGNUM SHOTGUN
(Introduction 1975)

Production reported that in order to obtain the correct point of impact, a slight upsweep was designed into the top Barrel. When the trial and pilot lot of Barrel Assemblies was completed, it was decided that this upsweep was visually unacceptable. Trial and pilot operations have stopped while product design revisions are being developed. A sample was shown.
