

BENCH REST BULLETS

R & D reported that 1,054,000 bullets have been produced in 1975 through May. Sales value is \$59,000, factory cost \$45,000 and factory profit 24%. There are approximately 1,000,000 bullets in the warehouse.

The possibility of introducing another caliber bullet is being investigated.

Marketing was requested to review the sales, cost and warehouse position of the present bullet.

TRAPSNEW MECHANICAL TRAP

(Introduction October, 1975)

R & D reported that the mechanical trap is being redesigned. The cocking lever is being repositioned to the rear of the trap and a throwing arm perimeter guard is being added. This trap is being compared with the following foreign and our own traps: Rossini, Hansen, Paselli and Blue Rock. Three prototype traps will be available in October, not production traps. A presentation of this program is planned for the June Operations Committee Meeting.

SKEET TRAP

(Introduction 1976)

R & D reported that assembly of the skeet traps requested for field evaluation will start in June. With the exception of some electrical parts, all other parts are ready for assembly.

The meeting adjourned at 12:51 p.m. The next meeting will be at Ilion on Friday, June 20, 1975 at 11:00 a.m.
