

FIREARMSBICENTENNIAL MODELS  
(Introduction 1976)

Production sample bicentennial guns in Models 742, 760, 870 and Nylon 66 were presented with the recommendation to release for invoice shipment.

Committee Action:

The Operations Committee approved these bicentennial guns and recommended that General Management release them for invoice shipment.

PALMA MATCH RIFLES

Marketing reported the National Rifle Association has requested that Remington supply 152 Model 40XC rifles and 13,000 rounds of ammunition for the August, 1976 Palma Match. The rifle would be the standard catalog item except for special marking. Ammunition would have special head stamp.

It was estimated this program would cost about \$20,000 and would be charged to promotional costs. The purpose of participating in this program is to promote center fire rifles and ammunition.

Marketing is to firm up this proposal with Production and R & D for capability of meeting specifications and delivery. Firm costs and justification are to be developed.
