COMPLAINT

ies on safety release + accuracy problem.

*Accuracy problem due to, it appears, a poor glass
sliding job. When trigger is pulled with safety switch
on, it FSR's when safety is ^{pushed to} fire position.
It also got bolt to follow down repeatedly - causes for
FSR + Follow down → over lubrication*

*per EF Sienkiewicz 10-3-85:
Install new trigger assembly
+ new stock all at no charge.
Send back with gun customer's*

*slung strap + swivel assembly +
his soft gun case. Also, target
gun for accuracy at ~~target~~ no
charge. Rth Pott*
