

Dear Sir or Sirs,

Return letter C - send 3

10000 blaze orange stickers

To whom it may concern, I have a model 600 Rem 222 cal. Rifle that has started firing upon the release of the safety! This has not only happened to me, but I have a friend who borrowed this gun when we went hunting. After loading the rifle, we started to get out of the car and the rifle went off, blowing a hole into my cars front passenger side floorboard and transmission. I myself personally think that this is not right whatsoever and something definitely needs to be done about it right away. I also can have signed statements if necessary. Also while target shooting this incident occurred again. This gun needs to be replaced before someone gets hurt or worst than that killed.

~~P.S. I am~~

P.S. I expect something
to be done immediately.
