METAL			C2			

Delayed firing and hot firing it fired when safety was released

MAIN FAULT: *Mfgn Aug 82 Bolt stop stuck, sear stuck and trigger was stuck as Received - TRIGGER ASSY gummed up with shellac like substance. Unable to duplicate customer's concern after cleaning. Trigger Assy. and the rest of the gun should be cleaned and maintained in a lightly oiled condition. Suggest having a qualified gunsmith assist with periodic maintenance. Exchange trigger Assy. to restore confidence in the rifle. Strictly as a gesture of goodwill. After cleaning trigger pull measured 7 lbs.*

PARTS: *5mm lift measured*
