MAIN FAULT *Mfgn date 7/85 Replacement trigger operates correctly in every respect. Ser # on breech bolt does not match owner doesn't know how bolt might have been changed - check headspace and proof bolt to gun. Clean action, polish top of magazine follower*

\* *After talking to customer I think that the snap was the safety when released, not the firing pin.*

COMMENTS *Trigger pull was 6# as per Ser Lift is .017*
