Thank you so much for your help
 on the telephone.
 Please find enclosed the
 700 series BDL 30-06 we
 spoke about on the phone.
 The fire arm has discharge when
 taking the safety off. I had originally
 attributed this to "catching the trigger"
 with a glove. In retrospect, it
 did discharge immediately upon
 striking the safety forward in order to
 effect a round.
 Thank you again for your
 help.

Sincerely,
 Keith D. Fortney
