Dear Sirs:

Subject: 25-06 Remington Rifle

I am sending you my 25-06 Remington rifle for repair. The gun exploded when I was hunting mule deer. I managed to open the bolt after the gun jammed.

My shooting glasses protected me from the powder burns, etc.

Please check out the gun and tell me what happened to it. Please let me know what can be done to repair this gun. I was using 120 grain Speer Boattail bullets at the time, with 50 grains of 4831 powder and CCI 200 large rifle primers.

Thank-you in advance for your early attention to this matter,

Yours truly,

Mr. Ken Ferestad
