

it hasn't been fired more than five or
six boxes of shells. Other words it isn't
worn out or anything and the bolt is still
tight. - What I want to know is could I
send the bolt assembly in and possibly
repair or
get a new one and if so how much will
it cost me. P.S. no part of the rifle or
bolt assembly has been worked or tempered
with. A friend of mine suggested I send
the whole rifle in, but as I already mentioned
the freight is expensive and I don't have the
proper shipping carton to send it in. What
must I do? I remain Very Truly Yours
