Dear Mr. Stekl,

Thank you for your attention to my firearm. However, I am convinced that the rifle did not fire due to contact with the trigger while removing the safety. Therefore, I will feel more comfortable handling the rifle with a new trigger assembly without a bolt lock - so that the bolt may be opened while the safety is "on". Enclosed is a check for \$35.00 to cover the cost of installation. Thank you again for your attention to this problem.
