RHP DEF

Dear Remington Arms:

I own a Model 660 Remington bolt action in .243 Caliber Serial #128832. It is a very fine rifle, but does fire when the safety is on without the trigger being pulled. This happened just a couple days ago while the rifle was resting on my son's lap.

Today I took the rifle into the gunsmith and he told me about your recall action on the Model 660. He would not even look at it.

Please advise.

Thank you.

Sincerely,

Dennis N. Howard
