Dear Remington, (PROPERTY DAMAGE)

I own a 1 year old Remington 700 22-250 bolt action rifle. Yesterday while showing a friend who wished to borrow it to hunt groundhogs how to load and unload it, it went off accidentally. I pushed the safety from safety to fire in order to eject all the bullets when the gun fired. My finger never touched the trigger nor was it even within the trigger guard.

Thankfully, no one was injured. However, it shattered my thermopane 48"x6" Pella window. My homeowners insurance will cover all but \$100 of the damage. I'm writing you asking that you reimburse
