TO: D. J. SANITA
FROM: E. F. SIENKIEWICZ
SUBJECT: MODEL 600, 6MM REMINGTON, SERIAL NO. 92537
HOWARD KLEIN, SAN ANTONIO, TX

Under separate cover I am forwarding the reference rifle to your attention. Attached is the correspondence received with the firearm in which he states that the new trigger replacement allegedly fired when the safety was pushed to the off position. *ham*

To give you a little background, this customer's letter was practically verbatim as the one his relative sent to Jack Chisnall concerning his Model 600. Jack gave him a replacement 700 BDL, 270 Win., at no charge. Now, this fellow is trying the same thing. Enclosed is that customer's letter for a comparison.

I examined this rifle being returned to you and found nothing wrong. However, I want the backup report from our Engineers. When the examination is completed by them, please notify me immediately of the results so I can return the gun to the customer as received with a report as to our findings.

E. F. Sienkiewicz
