

RECEIVING AND ESTIMATING REPORT

Ed

I had talked to you a couple of months back about my Rifle. The problem is that the Rifle on two Seperate occasions has fired when taking off the safety once on me while sighting it in, and once on my wife while hunting. on both occasions the trigger was pulled w/ the safety on and then when we clicked off the safety afterwards it went off. The rifle is fairly new and has had less than 40 Rounds through it I hope we can find a solution to this problem

Thank You

Sincerely
