

9/22/87

Dear Mr. ~~Langley~~ Langols:

Work has been completed on your Model 700, serial # 6448126, which you ~~was~~ returned for misfiring in ~~zero~~ zero degree weather.

We cleaned the original bolt assembly twice but the gun would still misfire under zero degree conditions. Our repairman then installed a new bolt assembly, did the freezer test for the third time and the rifle operated without misfiring.

Therefore, we are returning the rifle to you, prepaid, in the near future.

Thanks for calling the matter to our attention, Mr. Langols, and for giving us this opportunity to be of service to you.

Sincerely,

12HP
