Dear J. E. Preiser: *1/23*

I am writing to protest your product--the Remington 700 rifle! I find it to be a very hazardous design. I feel that you are endangering lives because of this gun.

I had a bad experience with your rifle this past fall. It could have been even worse. With your gun, a person can not take a shell out of the chamber when it is on safety. Because of that design, the safety was off, my rifle went off, and the shot caused damage to the door of my truck. What if my hunting companion had been up front in the truck at the time?

Please respond to this letter of complaint as soon as possible.

Sincerely,

Richard Loehlein
