

Remington Arms. -

I am a farmer & use my rifle for ground hog & coyote kill. While using it on Nov. 18, 1993 it fired while I was latching the batt down - since then I saw on 60 min. I believe how this rifle will do that - I contacted the place where I purchased the gun & they told me you were fixing the problem free. I have this rifle but don't want to have problems if you can fix it.

Rem. Mod. 700 I thank you
