 AT END: _____ IRATE _____ ANGRY _____ CALM X PLEASED

CUSTOMER CONCERN: Rifle was sent for examination because, "The safety malfunctioned when he took it off safety and discharged three times while the Gentleman was in his stand".

RESOLUTION: Discussed our findings with Mr. Graves and offered to clean present T.A. if possible; if not, we will replace assembly at N/C as good-will gesture. Mr. Graves said he appreciated our effort.

COMMENTS: Examination disclosed action and trigger assembly were heavily contaminated with oil & grease. Trigger parts moved very sluggishly. As received, action would not cock, firing pin followed down on cocking cam.
