

To whom it may concern,

My name is Jerry McRien, I am 21 years old and I have been hunting since I was 13 years old and all I have ever shot is Remington guns. I had a model 700 Bolt acting 30-06. I had it for about a year. I took my wife and two little boys to the Deer camp so I could sight it in. I shot it one time and it shot fine, I knocked off safely the second time and it fired without pulling the trigger and kicked me in my side. My side has swollen up and turned black. I took it back to K-Mart on Hwy 80 Jackson, MS. To exchange it for another and they had two more guns just like it and they were the same way, so I got my money back. I haven't found me another gun yet but it will be a Remington. I just wanted to let someone know how that model gun was doing before someone get hurt with them.

Thank you
Jerry McRien
