Dear Vic:

I am returning 1 model 700 EDL Remington rifle
serial No. 6499295 for repair. This rifle in two cases
has gone-off when the safety was pushed to the fire
position. Each instance occurred with different people
and both of them say they did not have their finger on
the trigger. One man blew a big hole in the floor of
his pickup truck.

Please fix this and send us a bill as soon as
possible.

Thanks
