MAIN FAULT

Mfgs 8-69 Unable to duplicate customer concern as recd. Trigger functions normal in every respect. Bolt stop release spring has been bent and twisted out of shape. Small rust pits on underside of Receiver. Firing Pin Head rustg inside of shroud. Rust on Sean and connector. Only fault found was that trigger just needs a good cleaning and free lubrication. Exchange trigger assy at service charge only to restore confidence in Rifle. Reason gathering of good will.

ARTS

COMMENTS

Trigger pull measured +1/2 lbs as
Sent 11/14 .0105 as Recd.
