Mr. Stekl,

Enclosed are the two (2) Mohawk Model 600 rifles about which we conversed on Wednesday, 22 November 1989. The rifle in question is the cal. 243. Again, please let me set the scenario to refresh your memory.

On Saturday, 18 November 1989, this rifle was in the process of being unloaded. When the safety was moved forward, in order to open the bolt for unloading, the rifle discharged.

Please check both rifles for possibilities of accidental discharge upon safety removal and any other mechanical factors which might contribute to accidental discharge.

Sincerely,

J. S. Myers
