Encl; 1 Remington 223cal. 700 EDL That I purchased
NEW twenty years ago.... I had not had occasion to
fire this gun until 1992
HOWEVER; The first ten shots were very clean, and worked
without flaw.... Then we noticed a "Jamming of the bolt"
we thought, and a few moments later pleaded a loaded round in
the barrel with the safety on-----let the safety off,
and "THANK GOD WE DIDN'T TRUST THE SAFETY DEVICE..."

It was P.O. Down Range...

I talked with your customer service lady and she suggested
a factory return

We are out of town Jan 29 - Feb 8 - then Feb 14 - Mar
we will be home February 8, and leave February 29.

If the gun is ready to ship prior to these dates it
will be helpful-- - if later-- hold til March 25, 1992

We have home since and
will have the gun ready
