Eliz., New York 13357

Sir -

The enclosed Remington 280AS SIN C653558
was returned to me with the following
comment:

Safety will not hold when switching to firing.
Some time it will fire when the bolt is
closed - without touching the trigger -
when the trigger is held forward it will
not malfunction -

In other words the gun is not safe!
Please check it out & repair as necessary.

Thanks.
Ken Presnell
