MAIN FAULT <i>Mfgn. 8-71 Closed bolt squeezed trigger, released safe and firing pin dropped. Note: trigger has no movement when safe and no overtravel. AFTER DISASSEMBLY FOUND that trigger, sear and bolt stop release were gummed up with sheller like substance and trigger would hardly move. Exchange trigger Assy. at approx price as a gesture of good will and to restore customers confidence in rifle. Metal parts only need a light film of light oil.</i>									
PARTS				COMMENTS					
<i>Trigger Assy Complete</i> <i>With Bolt Lock</i>				<i>Trigger pin minimum 4 3/4 to 5 1/4 #5 as reqd., break life was .011</i>
