Dear Sir,

I have a model 700, 270 Winchester Remington; serial number B6526411. I purchased this rifle new in August 1986.

In a hunting magazine, I saw your notice of recall for this model. The toll free number 1-800-634-2459 was listed. I called this number and stated that (1) this rifle has fired on its own during two separate situations. It fired (1) when I loaded the first shell and lowered the bolt to closed position and (2) when the bolt was in closed position and safety was on; when releasing the safety, it fired.

I bought a Remington because of its reputation and Brown name, I am greatly disappointed that I have not received communication from Remington
