

T

Dear Remington Arms.

ON TWO DIFFERENT OCCASIONS
 HAVE HAD TROUBLE WITH MY 3006 RIFLE
 ONE TIME I TRIED TO PUSH THE BOLT
 FORWARD WHILE TARGET PRACTICING. HE SE
 TO BE JAMMED! IT SEEMS THAT IF THE
 SAFETY POSITION WAS PARTIALLY ON, IT WOULD
 HAVE GONE ON JAM. AFTER WORKING WITH
 BOLT, PUSHING AND PULLING WITH PRESURE
 SLAMMING THE BOLT FORWARD THE GUN
 WENT OFF!! LUCKY I HAD IT POINTED
 UPWARD. THE SECOND OCCASION WHILE
 HUNTING IN THE MOUNTAINS, I LAID
 THE GUN DOWN ACROSS THE FRONT
 SEAT OF MY TRUCK FOR ONLY A MINUTE
 CHECKING TO MAKE SURE THE GUN
 WAS ALL THE WAY ON SAFETY.
 OF WHAT HAPPEND ON THE FIRST OCCASION
 KIND OF JAMMING BETWEEN SAFETY & F
 I WAS GOING TO FLIP IT ON FIRE THEN
 BACK ON TO SAFETY AGAIN. TO BE SURE
 THE GUN WAS ALL THE WAY ON
 SAFETY, THE GUN WENT OFF! GOING
 THROUGH NOT ONLY MY TRUCK BUT AN
 FELLOW HUNTER'S TRUCK!!!! BOY WAS
 LUCKY NO ONE WAS AROUND, I COULD
 OVER.
