

TTT - 65

At no time was the trigger ever touched. At this time the rifle was put away & the remaining 10 days I sat in Camp. With Elk tags & deer tags purchased with no gun to hunt with. This I am also very upset about.

I do not want this rifle repaired, I do not want this weapon at all. I could never have any confidence hunting with this rifle. I want this rifle replaced.

I still think Remington is the finest weapon made but this rifle is defective.

JAS:

After the repair for two week hunting trip & the issues that were involved, now I feel the Company will & should replace this rifle. I do not want a repair as this stops - also in the way.
