Thank you.
Rifle A.

This is a defective weapon, hardly
so one was killed. There were two
incidents. The first is only true
I used the gun in Idaho.

I used the gun in 1864. The first time the rifle was being used, when the boat was being loaded, before the gun fired. The second day after returning from pirates, I was un-loading the gun. I first took the rope, off and again the gun discharged.
