

12/14/87

Dear Jim,

As per phone conversation. Here is
the details of the account.

Subject was sitting in a 9/4 ton Chevy
pickup on a deer lease. Subject loaded
rifle with 4 shells in magazine & 1 in
chamber. Holding gun in left hand,
with right hand, he tried to move safety
to "safe" position, safety moved only 50
1/2 way. So subject moved safety
to fire position, and in doing so
the gun discharged ~~the~~ with projectile
entering his foot. Leaving the bullet
through the floor board and into the
right front tire! End!

Very truly yours,

JOHN R. PASHMAN
