Mr. Kast Arms Services Division Remington Arms Co., Inc. Ilion, N.Y. 13357

Dear Mr. Kast,

. .

in following up our phone conversation this morning I am returning the following guns.

Enclosed is my Remington 788 rifle in .243 Win., serial number B6159081 and my 700 Classic in 7 mm Mag. serial number B6666666866

The 700 is being returned to have you convert the safety to the old style that locks the bolt shut when the safety is child should be safety is child should be safety in the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child style that locks the bolt shut when the safety is child sh

The 7.88 is one you sent me as a warranty repair in place of my original that has a broken trigger mounting stud. The charber lacks any freebore or throat. I cannot chamber a round without forcing the bolt as the bullet hits the lands before closing. Please repair this condition.

I am an outdoor writer and this gun (the 788) is involved in an article I am preparing to run in The Vermont Sportsman, for which I am the editor. Anything you can do to expedite the return of these guns to me would be greatly appreciated.

Thank you.

Sincerely,

Bryce M. Towsley
