Remington Arms Co., Inc. 939 Barnum Ave. Bridgeport, Conn.

Dear Sira:

Several years ago I bought a Remington Model 700 7M/M Magnum. The caliber is excellent. However, I have missed several nice bucks during the last three years because of the mechanism of the rifle. On test runs it works fine, but when I am out hunting, take careful aim at a nice buck that comes along, and squeeze the trigger, nothing happens. I check the safety and when I push on the safety the gun goes off. Lucky Buck ... AMGRY HUNTER:!!

I have taken the rifle to Bob Reynolds Gun Shop three times. Each time they have said it was repaired. It wasn't.

I don't expect you to repair the rifle, but I do expect you to either tell me what is wrong with it see I can have it fixed, or supply me with the name of a good gunemith who knows what he is doing. I would hate to have to sell this gifle, because it is one of my favorites.

Sticerely yours,

Billy Y. Turner
